

## PROJECT > New World Symphony Campus

Shotcrete Wall Panel Construction  
Miami Beach, FL

### PROJECT DESCRIPTION:

QUIKRETE® Shotcrete MS was used to construct 25,440 sq. ft. of structural soundproof walls and floor panels. The micro silica enhanced 9000 psi, dry-process shotcrete was applied at a thickness of 2 1/2" over wire mesh. The high comprehensive strength allowed project engineers to reduce wall panel thickness from 3" to 2 1/2", decreasing the wall system's weight significantly.

### PROJECT START DATE:

October 9, 2009

### PROJECT COMPLETION DATE:

December 2010

**CONTRACTOR:** Lotspeich  
Construction

### QUIKRETE® PRODUCTS USED:

- 3,000 lb Shotcrete MS : 350 bags
- SPEC MIX® G7000 Silo
