**NEW QUIKRETE® FASTSET™ STUCCO PATCH
MAKES REPAIRS EASY, FAST AND EFFECTIVE**

ATLANTA (March 13, 2019) – Stucco accounts for about 20 percent of the current residential siding market, and while the material is durable, it will inevitably require maintenance.

[QUIKRETE®](#), the leading manufacturer of pre-blended commercial-grade cement and concrete products, has made stucco repair easier, faster and more effective with its new [QUIKRETE® FastSet™ Stucco Patch](#).

Designed for full-depth and thin repairs, QUIKRETE® FastSet™ Stucco Patch is a Portland cement-based material formulated to restore damaged stucco surfaces. QUIKRETE® FastSet™ Stucco Patch can be textured to match the surrounding stucco profile and can be painted in 90 minutes. Applied with a trowel or putty knife, a 20-pound pail of QUIKRETE® FastSet™ Stucco Patch will repair about 10 square feet at ¼” thick. QUIKRETE® FastSet™ Stucco Patch is shrinkage compensated to prevent cracks in larger repairs.

QUIKRETE® has a full-line of FastSet® products and commercial-grade stuccos. Visit www.QUIKRETE.com for more information about QUIKRETE® products including technical data, material calculator and project videos.

The QUIKRETE® Companies
