

# PROJECT > Ocean Gallery Condominium Resort

Polymer Modified Fiber-Reinforced Deck Mix  
St. Augustine, FL

## PROJECT DESCRIPTION:

The Ocean Gallery Condominium Resort in St. Augustine, Florida features 417 family-owned and rental units sitting on 42 acres next to the white sands and blue waters of the Atlantic Ocean. While the beachside resort offers many attractive benefits to residents and visitors, the salty, hot and humid environment proved detrimental to the structural integrity and safety of 13 balconies in the complex. Suncoast Innovations repaired or replaced compromised rebar before pouring 840 bags of 80 lb QUIKRETE® Polymer Modified Fiber-

Reinforced Deck Mix into forms to refurbish the balconies. The combination of the material's high-early strength, crack resistance and corrosion resistance ensure the repaired balconies are structurally and aesthetically sound long-term.

**CONTRACTOR:** Suncoast Innovations

**SUPPLIER:** HD Supply White Cap

## QUIKRETE® PRODUCTS USED:

- 80 lb Polymer Modified Fiber-Reinforced Deck Mix : 840 bags
