

# PROJECT > 57<sup>th</sup> Avenue Water Erosion Prevention

QUIKRETE® Rip Rap - Scrim  
Hialeah, FL

## PROJECT DESCRIPTION:

QUIKRETE® Rip Rap - Scrim was used for canal walk erosion control along the 57th Avenue canal in the Miami suburb of Hialeah, FL. MCM contractors placed the Rip Rap bags in a running bond pattern more than 8' high.

QUIKRETE® Rip Rap - Scrim is a high strength, 5000 PSI blend of sand and cement packaged in a polyester fiber netting reinforced, biodegradable paper bag. Rip Rap has the ability to set in a water immersion to ambient moisture alone. To improve the wall's vertical stability 3/8' rebar staples were driven into the bags alternating direction from tier to tier.

**CONTRACTOR:** MCM Contractors

## QUIKRETE® PRODUCTS:

- 80 lb Rip Rap – Scrim: 41,000 bags

## PROJECT START DATE:

June 2014

## PROJECT COMPLETION DATE:

December 2014
