

# PROJECT > Rip Rap Retaining Walls for Road Widening

I-75 & NW 138 St., Miami, Florida

**PROJECT START DATE:**

August 2009

**PROJECT COMPLETION DATE:**

October 2009

*Rip Rap - Scrim >>  
Product No. 1134-80*

**PROJECT DESCRIPTION:**

QUIKRETE® Rip Rap - Scrim was used for erosion control around culverts and to construct running-bond retaining walls on the NW 138th St. road widening project in Miami, FL.

QUIKRETE® Rip Rap - Scrim is a high strength, 5000 PSI blend of sand and cement packaged in a polyester reinforced biodegradable paper bag. Rip Rap has the ability to set in a water inversion to ambient moisture alone. To improve the wall's vertical stability 3/8' rebar staples were driven into the bags alternating direction from tier to tier.

**CONTRACTOR:** Williams Paving

**QUIKRETE® PRODUCTS USED:**

- Rip Rap - Scrim 7,000 bags
