

## PROJECT > Harbor Towers

Deck Mud & Polyurethane Self-Leveling Sealant

Long Beach, CA

### PROJECT DESCRIPTION:

The Harbor Place Towers in Long Beach CA underwent renovations in January of 2011. This exclusive beach side condominium project included a complete replacement of the western patio deck. QUIKRETE® Deck Mud was used to construct a two inch thick substrate slab for the exterior tile patio and curb supports. QUIKRETE® Deck Mud was chosen because of its superior workability and compaction around the deck drainage system. QUIKRETE® Polyurethane Self-Leveling Sealant was used to fill expansion joints on 8 foot centers.

**CONTRACTOR:** Mattucci Tile

### PROJECT START DATE:

January 2011

### PROJECT COMPLETION DATE:

April 2011

### QUIKRETE® PRODUCTS USED:

- 3,000 lb Deck Mud: 82 bulk bags
