L1: Acid Based Products

SAFETY DATA SHEET
(Complies with OSHA 29 CFR 1910.1200)

SECTION I: PRODUCT IDENTIFICATION

The QUIKRETE® Companies
One Securities Centre
3490 Piedmont Road, Suite 1300
Atlanta, GA 30305

Emergency Telephone Number
(770) 216-9580

Information Telephone Number
(770) 216-9580

SDS L1
Revision: May-15

QUIKRETE® Product Name
QUIKRETE® Concrete Etching Stain
Code #
7215-25, -26, -27, -28, -29

Product Use: Chemical stains for concrete and masonry

SECTION II - HAZARD IDENTIFICATION

Hazard-determining components of labeling: Hydrochloric Acid

2.1 Classification of the substance or mixture
Corrosive to Metals – Category 1
Acute Toxicity – Oral - Category 4
Skin Corrosion – Category 1A
Specific Target Organ Toxicity – Category 3

2.2a Signal word DANGER!

2.2b Hazard Statements
Corrosive to metals, especially aluminum, particularly foil
Causes severe skin burns and serious eye damage
May cause respiratory irritation
Harmful if swallowed

2.2c Pictograms

![Pictogram Image]
2.2d Precautionary statements
Do not handle until all safety precautions have been read and understood.
Wear protective gloves, eye protection, and protective clothing.
Do not eat, drink or smoke when using this product.
Wash thoroughly after handling.
Use only in a well ventilated area
Do not breathe fumes.

If swallowed: Rinse mouth. Do NOT induce vomiting. Serious burns may result.
If inhaled: Remove person to fresh air and keep comfortable for breathing.
If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately seek medical advice or attention.
If on skin (or hair): Remove immediately all contaminated clothing and wash before re-use. Rinse skin or hair with water.
If significant skin irritation or rash occurs: get medical advice or attention.

Immediately seek medical advice or attention if symptoms are significant or persist.

Keep in original container which has a specially modified plastic inner lining.
If necessary to transfer from original packaging, store in a corrosion-resistant, non-metal container.
Absorb spills to prevent material damage.
Store in a well-ventilated place. Keep container tightly closed.
Dispose of contents/containers in accordance with all regulations.

2.3 Additional Information

2.3a HNOC – Hazards not otherwise classified: None known

2.3b Unknown Acute Toxicity: None

2.3C WHMIS Classification
D1A - Poisonous and infectious material - Immediate and serious effects - Very toxic
E - Corrosive material

2.3d Label Elements According To WHMIS
Hazard Symbols

WHMIS Health Effects Criteria Met by this Chemical:
D1A - Acute lethality - very toxic - immediate
E - Corrosive to skin
E - TDG Class 8 - corrosive substance
SECTION III - HAZARDOUS INGREDIENTS/IDENTITY INFORMATION

Concentration ranges are provided due to batch-to-batch variability. None of the constituents of this mixture are of unknown acute toxicity.

May contain one or more of the following metal ions: Cu$^{+2}$, Fe$^{+3}$, Fe$^{+2}$, Cr$^{+3}$, CrO$_4^{+2}$

7758-99-0
7758-95-3
7705-08-0
10588-01-9
10025-73-7

Etching Stains may contain Cr (VI)

SECTION IV – First Aid Measures

4.1 Description of the first-aid measures

General information:
After inhalation: Remove person to fresh air and keep comfortable for breathing.
After skin contact: Remove immediately all contaminated clothing and wash before re-use. Rinse skin or hair with water.
After eye contact: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Flush under eyelids to clear any trapped debris. Continue rinsing.
After swallowing: Rinse mouth. Do NOT induce vomiting. Never give anything by mouth to an unconscious person.

4.2 Most important symptoms/effects, acute and delayed

Inhalation: May cause respiratory irritation
Skin contact: Causes severe skin burns
Eye Contact: Causes serious eye damage
Ingestion: Harmful if swallowed

4.3 Indication of immediate medical attention and special treatment needed:
Immediately seek medical advice or attention if symptoms are significant or persist.

SECTION V - FIRE FIGHTING MEASURES

5.1 Flammability of the Product: Non-flammable.
5.2 **Suitable extinguishing agents:** Dry chemical, foam, Carbon dioxide. Do not use water jet as an extinguisher, as this will spread the fire.

5.3 **Special hazards arising from the substance or mixture:** During fire, gases hazardous to health may be formed.

5.3a **Products of Combustion:** Hydrogen gas

5.3b **Explosion Hazards in Presence of Various Substances:** Reactions with aluminum, particularly foil, or other metals may generate flammable hydrogen gas.

---

### SECTION VI – ACCIDENTAL RELEASE MEASURES

6.1 **Personal precautions, protective equipment and emergency procedures:** Wear personal protective equipment (See section VIII). Keep unprotected persons away. Ensure adequate ventilation.

6.2 **Methods and material for containment and cleaning up:**

   **Large spills:** Stop the flow of material, if this is without risk. Dike the spilled material, when possible. Absorb in vermiculite, dry sand or earth and place into containers. Deactivation materials include lime, limestone, sodium carbonate, sodium bicarbonate, and dilute sodium hydroxide. Use a non-reactive, plastic stirring device to assist the neutralization process. Neutralize the material in several gradual steps – do not flood with large quantities all at once. Deactivation may release heat, steam and fumes. Allow each neutralization step to complete before introducing additional deactivation material. Once neutralized, the product may be disposed of.

   **Small spills:** Wipe up with absorbent material; clean surface thoroughly to remove residual contamination.

Never return spills in original containers for reuse. For waste disposal, see Section 13.

---

### SECTION VII - PRECAUTIONS FOR SAFE HANDLING AND STORAGE

7.1 **Handling**

   **Precautions for safe handling:** Ensure good ventilation/exhaustion at the workplace. Wear appropriate PPE (See section 8). Keep in original container which has a specially modified plastic inner lining. If necessary to transfer from original packaging, store in a corrosion-resistant, non-metal container. Dried residue is slightly acidic and care should be taken. Do not mix with bleach, cleaners or other chemicals; chemical reactions may occur and produce poisonous gas.

7.2 **Storage**

   **Requirements to be met by storerooms and receptacles:** Store in a well-ventilated place. Keep away from heat, sparks and open flames.

   **Information about storage in one common storage facility:** Store in containers specially designed for this product and strength.

   **Further information about storage conditions:** Keep out of the reach of children.
SECTION VIII – EXPOSURE CONTROL MEASURES / PERSONAL PROTECTION

8.1 Components with limit values that require monitoring at the workplace:
Hydrochloric Acid (CAS 7647-01-0)
- OSHA PEL 7 mg/m³ Ceiling
- ACGIH 7 mg/m³ TLV Ceiling
- NIOSH 7 mg/m³ Ceiling
- OSHA IDLH 50 ppm
- Canada TLV 7 mg/m³

8.2 Exposure Controls
Use ventilation adequate to keep exposures below recommended exposure limits.

8.3 General protective and hygienic measures
Keep away from foodstuffs, beverages and feed. Immediately remove all soiled and contaminated clothing. Wash hands before breaks and at the end of work. Avoid contact with the eyes and skin. Footwear and clothing may absorb the acid stain and later damage skin.

8.3a Personal protective equipment

Protection of hands:
Wear gloves of adequate length to offer appropriate skin protection from splashes. Nitrile, Butyl and PVC gloves have been found to offer adequate protection for incidental contact.

Eye protection:
Wear approved eye protection properly fitted or splash-proof chemical safety glasses.

Respiratory protection:
When workers may be exposed to concentrations above the exposure limit, they must use appropriate certified respirators.

SECTION IX - PHYSICAL/CHEMICAL CHARACTERISTICS

General Information
Appearance
- Form: Liquid
- Color: Various colors
- Odor: Pungent; acidic

pH-value at 20°C (68 °F): < 1
Boiling point/Boiling range: 226°F / 108°C to 127°F / 53°C
Flash point: None - Nonflammable
Auto igniting: Product is not self-igniting.
Vapor pressure at 21°C (70°F) 170 mm Hg (227 hPa)
Density at 25°C (77 °F): 1.12 – 1.30 g/cm³
Solubility in / Miscibility with
Water: Soluble
SECTION X – STABILITY AND REACTIVITY

10.1 Reactivity The product is stable and non-reactive under normal conditions of use.

10.2 Chemical stability Material is stable under normal conditions.

10.3 Possibility of hazardous reaction Hazardous polymerization does not occur.

10.4 Thermal decomposition / conditions to be avoided Contact with metal may release flammable hydrogen gas. Contact with incompatible materials. Do not mix with other chemicals.

10.5 Incompatible materials Bases, amines, acid anhydrides, metals, organic compounds, sulfides, permanganates, Fluorine, metal acetylides, hexalithium disilicide, and bleach.

10.6 Hazardous Decomposition or By-products Hydrogen chloride gas.

SECTION XI – TOXICOLOGICAL INFORMATION

11.1 Exposure Routes: Skin contact, skin adsorption, eye contact, inhalation, or ingestion.

11.2 Symptoms related to physical/chemical/toxicological characteristics:
   Inhalation: Vapors will irritate throat and respiratory system and cause coughing.
   Skin contact: Causes severe skin burns.
   Eye Contact: Causes serious eye damage.
   Ingestion: Harmful if swallowed. Causes digestive tract burns. Ingestion may produce burns to the lips, oral cavity, upper airway, esophagus and possible the digestive tract.

11.3 Delayed, immediate and chronic effects of short-term and long-term exposure
   Acute Inhalation – LC50 – Rat – 3124 mg/l, 1h
   Acute Oral – LD50 – Rabbit – 900 mg/kg

Short Term
   Skin Corrosion/Irritation: Causes severe skin burns.
   Serious Eye Damage/Irritation: Causes serious eye damage.
   Respiratory Sensitization: Not available.
   Skin Sensitization: Not available.
   Specific Target Organ Toxicity-Single Exposure: May cause respiratory irritation.
   Aspiration Hazard: Not available

Long Term
   Carcinogenicity: Not considered carcinogenic by IARC, ACGIH, NTP or OSHA
SECTION XII – ECOLOGICAL INFORMATION

12.1 Ecotoxicity
Because of the low pH of this product, it would be expected to cause long-term adverse effects to the aquatic environment. Do not allow undiluted product or large quantities of it to reach groundwater, water course or sewage system. Must not reach bodies of water or drainage ditch undiluted or un-neutralized

Aquatic – LC50 – Gambusia affinis – 282 mg/l, 96h

12.2 Persistence and degradability
No further relevant information available.

12.3 Bioaccumulative potential:
No further relevant information available.

12.4 Mobility in soil
No further relevant information available.

12.5 Other Adverse Effects
No further relevant information available.

SECTION XIII – DISPOSAL CONSIDERATIONS

13.1 Waste Disposal Method
Collect and reclaim or dispose in sealed containers at licensed waste disposal site. This material and its container must be disposed of as hazardous waste. Product must not be disposed of with household garbage. Do not contaminate ponds, waterways or ditches with chemical or used container.

13.2 Other disposal considerations
Uncleaned packaging
Recommendation: Fully empty containers can be disposed of as waste. If there is a chance for incidental exposure of individuals to trace liquid in the empty containers, first rinse the containers by filling with water and then emptying into the drain.

Recommended cleansing agent: Water, possibly with detergent.

SECTION XIV – TRANSPORT INFORMATION

UN-Number
DOT, ADN ADR, IMDG, IATA  1789
UN proper shipping name  Hydrochloric Acid
Transport hazard class(es)
ADR, IMDG, IATA

Class 8 Corrosive substances
Label 8

Packing group
DOT, ADR, IMDG, IATA Packing Group II

Environmental hazards:
Marine pollutant: No
Special precautions for user: Warning: Corrosive substances
Danger code (Kemler): 80
EMS Number: F-A,S-B
Segregation groups: Acids
Transport in bulk according to Annex II of MARPOL73/78 and the IBC Code Not applicable.

SECTION XV – OTHER REGULATORY INFORMATION

15.1 Safety, Health and Environmental Regulations/Legislations specific for the chemical

Canada
WHMIS Classification: Considered to be a hazardous material under the Hazardous Products Act as defined by the Controlled Products Regulations and subject to the requirements of Health Canada’s Workplace Hazardous Material Information (WHMIS). This document complies with the WHMIS requirements of the Hazardous Products Act (HPA) and the CPR.

15.2 US Federal Information

SARA 302/311/312/313 Components

CERCLA: LISTED.
Emergency Planning and Community Right to Know Act (SARA Title III):
  Immediate Hazard – Yes
  Delayed Hazard – Yes
  Fire Hazard – No
  Pressure Hazard – No
Reactivity Hazard – Yes
Extremely hazardous substance: Hydrochloric Acid (CAS 7647-01-0)
Reportable Quantity: 5000
Threshold Planning Quantity: 500 lbs

15.3 State Right to Know Laws
California Prop. 65 Components
WARNING: This product contains chemicals known to State of California to cause cancer and birth defects or other reproductive harm. Some colors may contain Chromium (VI).

15.4 Global Inventories
DSL All components of this product are on the Canadian DSL list.
TSCA No.: All constituents are listed in the TSCA inventory.

15.5 NFPA Ratings

SECTION XVI – OTHER INFORMATION

NOTE: The information and recommendations contained herein are based upon data believed to be correct. However, no guarantee or warranty of any kind, express or implied, is made with respect to the information contained herein. We accept no responsibility and disclaim all liability for any harmful effects which may be caused by exposure to silica contained in our products.
