### Recommended Guide For Selection of Mortar Type

Building Segment	Type
Exterior, above grade	
• Load-bearing	N or S
• Non-load bearing	N
• Parapet Wall	N or S
Exterior, at or below grade	S or M
Interior	
• Load-bearing	N or S
• Non-load bearing	N

QUIKRETE® has developed perhaps the best mason mix on the market today. We consulted masons, contractors and distributors to find out exactly what they want in a mason mix product. Then our research and development specialists at the QUIKRETE® Technical Center took this information and created the most superior commercial grade mason mix available.

QUIKRETE® Mason Mix is designed for laying brick, block or stone. It is pre-blended with sand for extra convenience. Plus, it is available in a variety of cement types and colors to give your customers the exact blend they need. So stock QUIKRETE® Mason Mix for all your professional masonry needs.

## 3. Product Description

### Basic Use: QUIKRETE®

Mason Mix is a contractor grade mortar mix designed for laying brick, block, or stone.

### Composition and Materials:

QUIKRETE® Mason mix is a pre-blended sanded product. It is available in Types M, N, or S using either Masonry Cement or a portland/lime blend.

**Colors:** QUIKRETE® Mason Mix is available in gray and additional colors by special order.

**Packaging:** Packaged in 60 lb. (27.2kg) and 80 lb. (36.3kg) bags.

## 4. Technical Data

QUIKRETE® Mason Mix meets or exceeds the property specifications requirements of ASTM C 270 for the designated type.

## 5. Installation

**Before Installation:** Surfaces to receive Mason Mix should be clean and free of dirt, loose debris, grease, oil, etc. for the best possible bond.

**Mixing:** QUIKRETE® Mason Mix requires only the addition of water. Mix to a plastic-like consistency.

**Installation:** Apply a full bed of mortar onto the base, approximately 1/2" to 3/4" (12 to 19mm) thick. Push downward into the mortar bed and sideways against the previously laid block with a slight twisting motion.

Tool the mortar joints when the mortar joints become "thumb print" hard: this will make the mortar joint water-tight and provide a neat appearance.

**Coverage:** Each 80-lb. (36.3kg) bag of QUIKRETE® Mason Mix will lay up to 37 standard bricks or 13 standard blocks.

**Curing:** Curing of masonry mortars is required only if conditions are very hot, dry or windy. In such cases, a gentle mist of water applied to the surface will prevent premature drying and improve the strength of the mortar.

**Maintenance:** None required.

## 6. Availability

QUIKRETE® Mason Mix is available at leading concrete construction supply houses and distributors. Pre-blended Mason Mix eliminates the need to have sand and cement delivered to the job site and to dispose of extra material after job completion.

## 7. Warranty

The QUIKRETE Companies warrant this product to be of merchantable quality when used

or applies in accordance with the instructions herein. The product is not warranted as suitable for any other purpose other than the general purpose for which it is intended. Liability under this warranty is LIMITED to the replacement of this product (as purchased) found to be defective, or at the shipping Companies' option, to refund the purchase price. In the event of a claim under this warranty, notice must be given in writing to Atlanta, GA 30305. The limited warranty is issued and accepted in lieu of all other express warranties and expressly excludes liability for consequential damages.

## 8. Maintenance

None required.

## 9. Technical Services

The QUIKRETE® Companies maintain technical field representatives throughout the country. Contact your local distributor for the name and number or call QUIKRETE® Construction Products at (404) 634-9100.
