

PROJECT > City Creek Center

Mason Mix & Core Fill Grout
Salt Lake City, UT

PROJECT DESCRIPTION:

The City Creek Center features 760,000 square feet of retail space with a 30,000 square foot retractable glass roof and approximately 300 housing units. The \$1.5 million project spans more than 20 acres in the heart of downtown Salt Lake City, Utah.

QUIKRETE® Commercial Grade Mason Mix Mortars and Core-Fill Grouts were used for structural and non-structural masonry construction throughout the two year project.

QUIKRETE® Mason Mix - Type S Mortars are computer weigh batched providing color

and performance consistency from batch to batch. Mason Mix - Type S mortars exceed the performance requirements of ASTM C 270 and ASTM C 1417 specifications.
