

PROJECT > Loews Santa Monica Beach Hotel

QUIKRETE® Deck Mud
Santa Monica, CA

PROJECT DESCRIPTION:

Overlooking historic Palisades Park and the Santa Monica Piers, the Loews Santa Monica Beach Hotel caters to celebrities, politicians, professional athletes and other upscale clientele with sophisticated services and amenities. The ocean-view pool, acclaimed Ocean and Vine restaurant and world-class day spa are popular hotel attractions that required renovations starting with the installation of more than 52,000 square feet of tile using QUIKRETE® Deck Mud. Applied from 1/2" to 1 1/2" thick in addition to providing a product with low-shrinkage and high-bond strength, QUIKRETE® helped West Coast Surfaces overcome storage challenges by delivering the deck mud on the west end of the pool

deck three stories from the ground. As a result, West Coast Surfaces finished the project on time and with no call-backs.

QUIKRETE® Deck Mud is a leveling mortar designed for interior or exterior underlayment, for all types of paver, tile, and marble installations on floors and counter tops.
