PROJECT Description:
QUICKRETE® Rip Rap - Scrim was used for erosion control around culverts and to construct running-bond retaining walls on the NW 138th St. road widening project in Miami, FL.

QUICKRETE® Rip Rap - Scrim is a high strength, 5000 PSI blend of sand and cement packaged in a fiber reinforced biodegradable paper bag. Rip Rap has the ability to set in a water inversion to ambient moisture alone. To improve the wall’s vertical stability 3/8” rebar staples were driven into the bags alternating direction from tier to tier.

CONTRACTOR: Williams Paving

QUICKRETE® PRODUCTS USED:
Rip Rap - Scrim 7,000 bags

START DATE: August 2009
COMPLETION DATE: October 2009
