

PROJECT > VDOT Salem District Bridge Rehabilitation

QUIKRETE® Shotcrete MS – Fiber Reinforced
Salem, VA

PROJECT DESCRIPTION:

The Virginia Department of Transportation (VDOT) is facilitating the rehabilitation of 92 bridges along 9,200 miles of roadway in the Salem District, which represents 12 counties in southwest VA near Roanoke. Lanford Bros. is charged with repairing any compromised bridge substructures including piers and foundation by removing damaged concrete, replacing rebar and other structural support, and spray applying QUIKRETE® Shotcrete MS – Fiber Reinforced. Once applied, Shotcrete MS - Fiber Reinforced is finished to match the contour of the surrounding concrete.

QUIKRETE® Shotcrete MS – Fiber Reinforced is a single component Micro Silica enhanced repair material that achieves more than 9,000 PSI at 28 days, and features very low rebound and permeability characteristics.

GENERAL CONTRACTOR:

Lanford Bros.

QUIKRETE® PRODUCTS:

- 80 lb QUIKRETE® Shotcrete MS – Fiber Reinforced: 11,000 bags

PROJECT START DATE:

March 2015
