

PROJECT > The Miami Woman's Club

Stucco Restoration
Miami, Florida

PROJECT DESCRIPTION:

Complete stucco facade restoration of the historic Miami Woman's Club, originally constructed in 1925.

QUIKRETE® FastSet Repair Mortar was used for vertical repairs to damaged window sills and the cement plaster base coat. After the deteriorated original stucco finish was removed, a stucco bonding adhesive was applied to the smooth surface. QUIKRETE® Base Coat Stucco was used to apply a 5/8" thick base coat and texture coat to match the original Mediterranean finish.

PROJECT START DATE:

October 2009

PROJECT COMPLETION DATE:

March 2011
