QUIKRETE® HITS HOMERUN WITH BALLPARK IN ARLINGTON PROJECT
Red Ranger Mortar Mix Used to Rebuild Backstop and Update Main Concourse Concessions

ARLINGTON, Texas (May 7, 2013) – Fans attending Texas Rangers home games during the 2013 Major League Baseball season are experiencing the contests at a new-look Ballpark in Arlington. Originally opened in 1994, the Rangers Ballpark in Arlington was updated prior to this season with masonry work to the backstop, concession stands, club level dining, ticket box offices and lounge for season ticket holders using QUIKRETE® products including specially formulated pre-blended Ranger Red mortar mix. In addition to providing the specialty mortar mix, masonry contractor TST Construction Services counted on QUIKRETE® to overcome time and space restrictions in installing more than 7,500 square feet of brick, block and cast stone in time for the team’s 53rd season.

“We had approximately three weeks to mobilize with shop drawings, special order products and custom color mortar to meet the tight schedule of completing the project before the baseball season started,” said Michael Pinson, project manager for TST Construction Services. “Additional challenges included limited access to the field and limited staging area for products. To assist with the space restriction, QUIKRETE provided a mini silo system that not only required very little room for mixing and pouring, but also enhanced labor and material efficiency on the job.”

QUIKRETE® provided the following products for the Ballpark in Arlington project:

- 20 – 80-pound bags of white Portland Lime Type N (PLN) Mortar
- 225 – 80-pound bags of Ranger Red PLN Mortar
- 252 – 80-pound bags of Course Grout
- 210 – 80-pound bags of gray Portland Line Type S (PLS) Mortar
- 378 – 80-pound bags of white PLS Mortar
- 22 – 3,000-pound bulk bags of white Fine Grout
